

***Dinosaurs: Down to the Bone* roars to life at TELUS World of Science – Edmonton**

Edmonton, AB – March 1, 2018 – Unearth newly revealed secrets 65-million years in the making when TELUS World of Science – Edmonton opens ***Dinosaurs: Down to the Bone*** on Friday, June 1. The discovery of one fossilized bone marks the beginning of an amazing story about creatures from long ago. Now, embark on a prehistoric journey about what life was like on Earth in the time of the dinosaurs.

The ***Down to the Bone*** exhibition invites guests to challenge what they think they know about dinosaurs as they explore spectacular prehistoric scenes, life-sized animatronic dinosaurs, full-scale skeletons, intriguing fossils, engaging content, and interactive activities.

The most well-known dinosaur of our time – *Tyrannosaurus Rex* – is explored in-depth. Most commonly known for being a ferocious, bone-crushing killer, what many people do not know about *T. Rex* is that they were not always the biggest predators to roam the Earth. A newly-discovered group of dinosaurs – *Dromeosaurs* – are considered to be the dinosaurs that most closely-resembled birds. Dromeosaurs also varied in size by a wide margin.

“We are excited to offer another incredible science experience that shares the spectacular stories of dinosaurs,” said Alan Nursall, President and CEO of TELUS World of Science – Edmonton. “***Dinosaurs: Down to the Bone*** explores fossil discoveries, which are an important part of Alberta’s history, and blends science with hands-on experiences and fun for the whole family.”

Each of the animatronic dinosaurs were custom designed and handcrafted by a team of palaeo-artists, using the best available data from palaeontologists. Accurate to how scientists believe each dinosaur looked and sounded, the animatronic dinosaurs were designed to be as lifelike and true to form as possible.

Dinosaurs: Down to the Bone inspires curiosity and captures human fascination during an exciting time in history. The exhibition opens at TELUS World of Science- Edmonton on Friday, June 1, 2018. To purchase tickets or for more information call 780-451-3344 or visit twose.ca.
