

ELECTRIC CAR MATERIALS LIST

Description

Strap on your seat belts! Students will have an opportunity to construct a fully functioning electric car using prepared class sets of materials and an instructional video made by TWOSE education specialists.

This is a pre-recorded instructional video for the construction of an electric car. All car material kits will be shipped to schools in advance.

Teacher Required Materials:

- 1 pair of scissors per group
- 1 black permanent felt pen per group
- 5 pieces of 5 cm long strips of black electrical tape per student
 - *Tip: stick the end of 5 pieces of tape on the edge of each student's workspace desk or table so they're ready to use*

Materials supplied by TELUS World of Science - Edmonton:

- 1 electric car kit per student
 - 1 roll electrical tape
 - Teacher troubleshooting handout
-
