## **T. REX roars onto IMAX Theatre Friday, June 28 at TELUS World of Science - Edmonton**

**EDMONTON, AB – June 5, 2024** – TELUS World of Science – Edmonton announces the highly anticipated opening of T. REX in IMAX. This thrilling IMAX® 3D documentary will transport audiences from a present-day dig site to the ancient world of the *Tyrannosaurus rex*. The film, opening Friday, June 28, promises to be the most dazzling and accurate *T. rex* documentary ever made.

"*T. rex* captures imaginations like no other dinosaur, and we are very excited to present this new film to Edmonton audiences," said Constance Scarlett, President & CEO of TELUS World of Science – Edmonton. "Guests will be delighted by this unprecedented cinematic experience and inspired by the science of paleontology and how our understanding of *T. rex* has evolved."

Drawing upon advancements in film and CGI technology, the film T. REX combines state-of-the-art visuals with the latest revelations in tyrannosaur paleontology from the past 25 years. Collaborating with top scientists, natural history institutions, and pioneering paleo and visual effects artists, the filmmakers aim to deliver an immersive experience that captivates and educates audiences of all ages.

Audiences will embark on an extraordinary journey to the Hell Creek Badlands in North Dakota to witness groundbreaking discoveries that were made in the summer of 2023. From there, they will be transported back in time to the era of the *Tyrannosaurus rex*, encountering the king of dinosaurs and its carnivorous Cretaceous cousins in breathtaking detail.

Including famous specimens, landmark discoveries, and wild cinematic depictions over the last century, the film will explore the interplay between speculation and evidence and reveal how the process of science refreshes and reimagines our understanding of this legendary dinosaur.

T. REX is from the team behind such prehistoric hits as *Dinosaurs Alive*, *Titans of the Ice Age*, and *Dinosaurs of Antarctica*.
